

Internship Report Presentation

Web Development with HTML/CSS

Sarita Kumari · August – September 2026

Entrevescence, IIIT-Allahabad · *Powered by EngineerCore*

CANDIDATE PROFILE

About the Student

- **Name:** Sarita Kumari
- **Internship Domain:** Web Development with HTML/CSS
- **Training Duration:** August – September 2026
- **Organization:** Entrevescence, IIIT-Allahabad
- **Powered by:** EngineerCore

About the Program

Web Development with HTML/CSS Training

Introduction

Front-end web development fundamentals and industry practices

HTML Structure

Understanding and building webpage structure using HTML

CSS Design

Designing and styling webpages with CSS for visual appeal

Practical Coding

Hands-on webpage development for structured, user-friendly output

CHALLENGE

Problem Statement

Bridging Theory and Practical Implementation

Beginners may understand basic web concepts theoretically but require hands-on experience to apply them effectively in real projects.

- ❏ Practical exposure is the critical gap between knowing and doing in web development.

Core Practical Gaps Addressed

- Creating well-structured webpages using HTML
- Using HTML tags correctly and semantically
- Applying CSS properties for visual design
- Designing organized page layouts
- Creating functional navigation menus
- Adding images, links and interactive forms
- Developing responsive webpage layouts

Project Objectives

Training Goals & Outcomes

1

HTML & CSS Fundamentals

Understand core concepts, tags, properties and styling techniques

2

Webpage Creation

Create attractive, well-structured and visually consistent webpages

3

Responsive Layouts

Design layouts that adapt gracefully to different screen sizes

4

Practical Coding

Practice real front-end coding, debugging and problem-solving

5

Developer Confidence

Build confidence and proficiency in webpage development workflows

TECH STACK

Technologies & Tools

The Toolkit Behind the Training

Core Technologies:

- **HTML5** — webpage structure and content
- **CSS3** — styling, layout and visual design

HTML Concepts Practiced:

Headings, Paragraphs, Images, Links, Lists, Tables, Forms

CSS Concepts Practiced:

Colors, Backgrounds, Fonts, Borders, Spacing, Layouts, Responsive Design

System Architecture

Webpage Development Workflow

HTML provides the structural foundation while CSS controls presentation, styling and layout – working together to deliver a complete, responsive webpage.

Methodology

Practical Learning Journey — 10 Stages

01

Web Development Fundamentals

Introduction to the web ecosystem and front-end concepts

03

HTML Elements Practice

Hands-on coding with headings, lists, images, links and forms

05

CSS Styling Application

Applying styles to real HTML elements and page sections

07

Images, Links & Forms

Embedding media and building interactive form elements

09

Responsive Design

Adapting layouts to desktop, tablet and mobile screen sizes

02

HTML Structure

Understanding document structure, tags and semantics

04

CSS Properties

Learning colors, fonts, borders, spacing and display properties

06

Navigation Menus

Creating structured, styled navigation bars for webpages

08

Structured Layouts

Building multi-section page layouts using CSS techniques

10

Final Responsive Website

Developing the complete project deliverable end-to-end

PROJECT DELIVERABLE

Project & Learning Outcomes

Basic Responsive Website

Technologies: HTML5 + CSS3

Website Sections:

Key Feature: Simple, structured and user-friendly responsive design

Learning Outcomes Achieved

- Stronger HTML/CSS fundamentals and coding proficiency
- Ability to independently create and style complete webpages
- Clear understanding of website structure and layout principles
- Real-world practical front-end development experience
- Improved debugging, problem-solving and analytical thinking
- Solid foundation for advancing into JavaScript, React and full-stack

CERTIFICATION

CERTIFICATE ID : EN-SI-7322

MODE: VIRTUAL

DURATION: AUG-SEOT 2026

Conclusion

Key Takeaways & Future Scope

Practical Experience

Gained valuable hands-on experience in real-world web development

Strong Fundamentals

Strengthened core skills in HTML5 and CSS3 through consistent practice

Responsive Design

Developed and delivered a basic responsive website as a practical project

Future Scope

Ready to advance into JavaScript, React and full-stack development
